Foreword

The Statistical Yearbook Bangladesh is a very important regular yearly publication of Bangladesh Bureau of Statistics (BBS). This publication greatly contributes as a source of statistics to policy-makers, researchers, academicians, statisticians and other general users. It can help in meeting data demand to formulate effective and fruitful plan, policy and strategy. It can be regarded as a unique tool that might substantially assist us in meeting emerging issues in several areas of socio-economic sectors. This publication would also be helpful as a data source to monitor Sustainable Development Goals, 8th Five Year Plan, 2nd Perspective Plan, National Social Security Strategy and Bangladesh Delta Plan 2100 etc.

Compiling a large publication like the Statistical Yearbook Bangladesh is a robust and time-consuming task. Despite that, the Bangladesh Bureau of Statistics (BBS) has been able to produce this publication yearly. Surely, references and sources of data in this publication have made an opportunity for stakeholders to make a policy plan as well as project analysis. This yearbook contains a complete set of data in much detailed form which can be useful for enthusiastic researchers and planners.

My sincere thanks to the Director General and his colleagues at BBS for their relentless efforts in bringing out the current edition of this publication. I would also like to convey my heartfelt gratitude to the officials of SID involved in the improvement of the quality of this publication by putting their valuable corrective suggestion. I acknowledge the great contribution of the local bodies, government officials and officials of source agencies who have continuously helped BBS by providing data. I hope that they will continue the same cooperation in future.

I do hope that this publication will be of immense help to concerned public representatives, policy-makers, officials, planners, academicians, researchers, business communities, students and all other data users.
